

## LOCATION OF MYTHICAL CITY OF **ATLANTIS** UNVEILED BY TEAM OF FILM MAKERS AND ARCHAEOLOGISTS

**Italy, September 23rd 2018** – A two year search beginning in secrecy has culminated with the discovery of the legendary city of **Atlantis** and its exact location. The team who originally started their journey in 2016 conducted a series of extensive expeditions to unearth irrefutable evidence of the existence and location of the lost city. The location of the city has boggled the minds of scientists for centuries and has inspired noted authors and respected filmmakers alike.

The team includes specialists and archeologists from **Merlin Burrows** who used the latest scientific research, satellite research techniques, proprietary non-invasive scanning technologies, traditional archeological methods and laboratory sciences to prove their theory conclusively. “The technologies we used to identify these finds have led us to over 200 discoveries of extraordinary importance scattered all over the world”, said Timothy Akers - Head of Research at Merlin Burrows, Archaeologist and Space Researcher.

The sites found on the journey are new to the public and will no doubt inspire future discoveries. “None of these discoveries have EVER been recorded... by ANYBODY!”, commented Digby Stevenson - Senior Archaeologist and Alumnus of University College London.

Alongside **Merlin Burrows**, **INGENIO FILMS** joined the journey to Atlantis filming never before seen sites and discoveries further supporting the existence of Atlantis. A trailer of the film “**Atlantica**”, the first of many, will provide viewers with a taste of what is about to come. The trailer will premier on the 23<sup>rd</sup> of September 2018 and will be available online.

“**Atlantica**”, the first film in the series of **ATLANTICA**, carefully compares and researches each one of the finds using Plato’s exact descriptions of the Lost Empire of Atlantis.

“The discoveries are spellbinding and inspiring! I grew up learning about the legend of Atlantis and I am thrilled I could record its discovery! It is a shining example of how complex and advanced early civilization was!”, said Michael Donnellan - Executive Producer, **INGENIO FILMS**.

**INGENIO FILMS** is producing a “**Series of Legendary Discoveries**”, beginning with the mini-series “The Official Discovery of the Lost Empire of Atlantis, in the “**Atlantica**” Series. **INGENIO FILMS** currently has footage of over 200 previously unseen discoveries located all over the world.
